SKILLS

Python, R, SQL, C#, .NET, ReactJS, TensorFlow, PyTorch, Scikit-Learn, Pandas, Polars, Spacy, NLTK, Tableau, Power BI, Looker Studio, Matplotlib, Seaborn, Streamlit, Ggplot, AWS (EC2, S3, LightSail, Sagemaker, Bedrock), GCP, Azure, Git, Docker, CI/CD

PROFESSIONAL EXPERIENCE

Data Science Intern / AI Acceleration Analyst
Enterprise Technology, Arizona State University | Tempe, Arizona August 2024 – Present

- Analyzed IT support tickets utilizing a BERT-based NLP model, achieving 85% accuracy for real-time insights, and identifying key themes in support requests that enhanced resource allocation.
- Collaborated with engineering team to craft an Ethical AI engine using Python, and the DeepEval framework to evaluate LLMs and chatbots, achieving over 60% accuracy and minimizing bias on a proprietary AI platform.
- Validated the readiness of new R&D AI tools through rigorous testing protocols, ensuring secure deployment to 50+ faculty and 70,000 students, which accelerated project timelines by 15%.

Software Engineer
Asigma Capital Advisory Services Ltd | Kampala, Uganda January 2022 – July 2024

- Led a team of 5 engineers on an agricultural linkage application using C#, ReactJS and SQL, improving app performance by 40% and helping 20,000+ farmers gain access to premium markets.
- Delivered Power BI dashboards providing critical insights into fund disbursement, which facilitated data-driven decisions on a 5-year $20M fund that supported 60,000+ businesses recovering from COVID-19 disruptions.
- Developed automated Python Extract, Transform & Load (ETL) pipelines for real-time survey data, reducing manual workload and accelerating analytics by 70%.
- Innovated and built an advanced data migration platform using Python and Streamlit, enabling database to database and spreadsheet to database migrations, cutting migration times by 70%.

Data Analyst
Asigma Capital Advisory Services Ltd | Kampala, Uganda November 2019 – January 2022

- Designed real-time dashboards and analytics with SQL and BI tools, ensuring 99% uptime, enhancing decision-making.
- Built cost-visualization dashboards utilizing SQL and Looker Studio for USAID's FtF program, enhancing production optimization by 20% and fundraising $1.5M+ for 20+ businesses.
- Led the design and build of real-time performance tracking dashboards utilizing STATA, Python, and Looker Studio to monitor primary data collection, improving overall efficiency by 80% and leading to company-wide adoption.

PROJECT EXPERIENCE

RAG-Enhanced LLM for Classified Information Detection (Capstone) December 2024 – April 2025

- Teamed with 6 AI students to develop a document classification pipeline by leveraging synthetic data generated by fine-tuned Ollama models, reducing false negatives by 15% while maintaining high precision.

Yelp Reviews EDA and Sentiment Analysis (Class Project) February 2025 – March 2025

- Benchmarked BERT against LLMs (Claude, Llama and Gpt4o) for sentiment analysis on 8,000 Yelp reviews; generated topics 80% faster with 80% more human-readable themes for business insights.

Real-time ETL and Analytics Platform (Client Project) November 2021 – December 2021

- Designed an ETL pipeline with Python and SQL for migrating 1M+ records from DynamoDB to BigQuery, increasing access to business-critical insights and reduced lag.
- Developed interactive BI dashboards with SQL and Google Looker Studio, streamlining decision-making for 100+ clients across 3 continents and increasing client engagement by 20%.
- Optimized SQL database performance in Big Query by indexing and query tuning, reducing query response times by 80%.

EDUCATION

W. P. Carey School of Business at Arizona State University August 2024 – May 2025
Master of Science in Artificial Intelligence in Business Tempe, Arizona

- Mastercard Foundation 2024 Innovation in Technology scholar – 1 of 5 selected out of 2,000+ applicants.

Sabaragamuwa University of Sri Lanka June 2014 – July 2018
Bachelor of Arts (Hons) in Statistics Belihuloya, Sri Lanka
